

## NOMENCLATURAL CHANGES

The genus *Taeckholmia* L. Boulos (1967) is considered a synonym of *Atalanthus* D. Don (1829) (Farr et al. 1986; Mabberley 1987). 5 Macaronesian taxa have so far no names under *Atalanthus*:

*Atalanthus canariensis* (Boulos) A. Hansen et P. Sunding, comb. nov.  
Basionym: *Taeckholmia canariensis* Boulos, Bot. Notiser 120: 100 (1967).

*Atalanthus capillaris* (Svent.) A. Hansen et P. Sunding, comb. nov.  
Basionym: *Sonchus capillaris* Sventenius, Addit. Fl. Canar. 1: 85 (1960).

*Atalanthus microcarpus* (Boulos) A. Hansen et P. Sunding, comb. nov.  
Basionym: *Taeckholmia microcarpa* Boulos, Bot. Notiser 120: 102 (1967).

*Atalanthus regis-jubae* (Pit.) A. Hansen et P. Sunding, comb. nov.  
Basionym: *Sonchus Regis-Jubæ* Pitard in Pitard et Proust, Iles Canar., Flore Archipel: 262 (1908).

*Atalanthus webbii* (Sch. Bip. in Webb et Berth.) A. Hansen et P. Sunding, comb. nov.  
Basionym: *Sonchus webbii* Schultz Bipontinus in Webb et Berthelot, Phytogr. Canar. 2: pl. 136 (1848), p. 444 (1849-50).  
Syn.: *Taeckholmia heterophylla* Boulos, Bot. Notiser 120: 104 (1967).

According to Miller (1985, p. 519) the name *Lavandula coronopifolia* Poir. in Lam. (1813) has priority over *L. stricta* Delile (1813), hence:

*Lavandula coronopifolia* Poir. var. *subtropica* (Gandoger) A. Hansen et P. Sunding, comb. nov.  
Basionym: *Lavandula subtropica* Gandoger, Bull. Soc. Bot. Fr. 65: 66 (1918).  
Syn.: *L. stricta* Del. var. *subtropica* (Gand.) Chaytor

*Pericallis lanata* (L'Hér.) B. Nord. var. *cyanophthalma* (W.J. Hooker) A. Hansen et P. Sunding, comb. nov.  
Basionym: *Senecio heritieri* DC. var. *cyanophthalmus* W.J. Hooker, Curtis's Bot. Mag. 67: pl. 3827 (1841).

Willemse (1991) followed Briquet's broad concept of *Satureja*, including *Micromeria* in this genus, also pointing to the practise used in the Med-Checklist (Greuter et al. 1986). Willemse made valid combinations within *Satureja* for most of the Macaronesian taxa that had not already been named by Briquet. For 11 Canarian *Micromeria* taxa there exist no names under *Satureja*:
